Fatal Accident at Local Brick Plant

John Siddall Instantly Killed by Blast
at Premier Brick Plant

John Siddall, who came to Redcliff last September to work in the Premier Brick plant here, was instantly killed yesterday morning while at his work in the shale mine in connection with the plant. Mr. Siddall had charge of the blasting operations and had prepared three charges. Two of them exploded and, thinking he had not been successful in lighting the third fuse, he returned to persons that operation. The third fuse had been ignited and just as he got to it the charge exploded. The heavy force struck down with full force on the forehead, killing him instantly.

Covered, Dr. Rogers was immediately summoned and, after reviewing the circumstances, decided that an inquest was unnecessary.

Deceased was a single man, by birth and at one time was in the metropolitan police force in London. He came to Canada from Australia and since arriving in Redcliff last September has been employed at the Premier Brick plant. Because of this violent disposition little is known of his family connection but he is believed to have been a widower and it has been learned he has a brother in the States.

The husband has been communicated with and funeral arrangements will not be made until he arrives here this evening.

Although of a quiet unassuming disposition deceased had made many friends since coming to Redcliff and the news of his sudden death was a great shock.

SCHOOL REPORTS

The following is the standing of Redcliff high school for the term ending December, 29th.

Grade Nine

1, Lucy Blanes, 2, Helen Matheson, 3, Irene Buchholz, 4, Martel Collard, 5, Phyllis Sanderson, 6, Francis Boney, 7, Jean Armstrong, 8, M. McCleary, 9, Kate Waters, 10, Jessie Maryn, 11, Isabel McFadden, 12, Mary Kellie, 13, Eva Steute, 14, Clifford Berggren, 15, Frank Fennell, 16, Margaret Walker.

Grade Ten

William Edstrom, Helen Hill, Margaret Martin, Jean Moore, Evelyn Hicks, Ruby Ferns, Dorothy Ferguson, Rita Melson.

Grade Eleven

Nona Rose and Tom McElvogue, Phyllis Buchholz, Elsie Frey, Hugh Matheson.

Standing of Pupils in Grade V. Sr. at Christmas Examinations

John Schoop, Charles Miller, James Skidmore, Keith Ellis, William Mease, William Mignault and Albert Podesta Edward Chang, Grace Mackell, Jean Skidmore, George Elliot, Fredrick Matheson and Eugene McAfee, Dorothy Kest, Jemima Fulton, Stanley Glum, Marie Hostland, Edna Moore, Kerwood Henderson, George Waters.

Grade VI. Jr.

Margaret Davis and Ellen Kall, Samuel Fulton, Pearl Moore, Lillian Lemming, Agatha Reysen, Edward Mackell, Stella McCleary, Annie Hostland, Harold Lemming, Louis Smith, Frank Schaeffer, Anna Todd, William Pearson, Mary Soukup, Edith Collard, William Tunks, Eric McCleary, Raymond Dubois Edmund Lyon, Janna Brown, Margaret Johnson, Erven Bealer, James Fulton. (Note: Pupils' reports will be sent to parents after Christmas holidays.)

Results of Christmas examinations in Mrs. Stone's room:

Grade VIII

(The figures after each name represent the percentage)

Lorna Ferns, 79; Arthur Harris, 76; Mildred Beattie, 73; Alice Todd, 71; Lucy Maxwell, 69; Rose Fishburne, 64; Clara Williamson, 63.

Grade VIII

Ernest Podesta, 78; Helen Rose, 77; Madeline Lema, 77; Jim McDermott, 74; Don Jensen, 73; Chas. Todd, 73; Edwin Miller, 68; Barbara Schmidt, 67; Joyce Hodges, 64; Tunde Kallie, 64; Elmer Kest, 64; Margaret Rothertford, 61; Doris Reinhardt, 55; Ned Martin, 54; Arnold Hostland, 42.

Grade VI Sr.

John Peterson, 77; Karen Peterson, 77; Robert Buchholz, 64; Donald Duffield, 64; Annie Shaw, 63; Mary Goodie, 62; Clem Johnson, 61; Janet Paulsen, 60; Anna Kerr, 60; Anna Bessie, 56; Frank Bodatz, 47; John Lutton, 47; Robert Stratton, 43; Lillian Cairns, 2; Promoted to Grade VIII, Ernest Podesta, Helen Rose, Madeline Lema. Promoted to Grade VII, John Peterson, Karen Peterson.

Christmas Day at St. Ambrose Church

Models Presented to Children at the
Children's Service

There were good congregations at all services on Christmas, day and the singing was hearty and inspiring. Holy for decoration was kindly given by Mrs. H. Reidsdale, and the altar flowers by Mrs. Hicks. The anthem, "Amen, arise, for thy light is come," (Pearson) was rendered by the choir at Evening, together with three carols; and carols were also sung by the children in the afternoon. At the Children's service the Victor presented medals to those who had attended all Advent services and also little silver crosses to the elder members of the children's choir. There were 20 communicants at the celebrations, including most of the newly confirmed.

SMALL TURNOUT AT DANCE LAST FRIDAY

There was only a small attendance at the dance in Cliff hall last Friday evening, but what was lacking in numbers was made up with the good time provided.

Churches

ST. AMBROSE CHURCH

Rev. J. L. Cooper, R.A., Vicar
Circumcision of our Lord, Jan. 1st. 8 o'clock (elder classes), 10 a.m. Mattins and Sermon, 11 a.m. 8.8. (primary classes), 3 p.m. Evening song and Sermon, 7:30 p.m. Thursday—W. A. annual meeting in Parish hall.

Friday—Feast of the Epiphany. Holy Communion, 9 a.m. Mattins and Litany, 11 a.m. Evening song and address, 7:30, followed by Choir practice.

GORDON MEMORIAL UNITED CHURCH

R. N. Matheson, R.A., Minister.
Strangers and visitors are very cordially invited to attend the services and to share in the activities of Gordon Memorial church.

Organists meet as follows—

The Official Board on 2nd Tuesday for each quarter at 8 p.m.
Committee of Stewards on the 2nd Tuesday of each month at 8 p.m.
Women's Missionary Society on the 4th Thursday of each month at 8 p.m.
Ladies' Aid, every Thursday, 3 p.m.
Mission Band every second Monday at 4:15 p.m.

New Year Greeting to one and all Sunday, January 1st, 1928.

10 a.m. Church School.
11:15 a.m. Baptism and Jesus.
11:15 a.m. Public Worship.
Subject: "Today."

7:30 p.m. Evening Service.
"Thy Greet for the New Year."

CHURCH OF THE BERTHERN

Rev. D. Heltgen, Minister

Usual services.

ST. MARY'S CHURCH

Celebration of Mass, Second and Fourth Sundays of each month at 8 p.m.

Promising Outlook For The New Year

AS the year 1927 draws to a close the people of Canada can view with gratitude and gratification the fulfilment of the optimistic hopes deposited in it at the outset. The year has been one of progress and each succeeding month has served to further improve the position of the country in its economic life, so that it is difficult to discover any line of activity which has not a strengthened status. Regarding the situation in other countries which similarly suffered in the post-war depression Canada may congratulate herself upon her steady ascension as she nears the point where a development, almost unprecedented, was indicated in 1924.

Compelling first attention is the Western Canadian grain crop which, when final figures are received, promises to rank as one of the largest and most remunerative in Canadian history. Four such crops received in succession have placed farmers in increasingly more enviable circumstances and have brought about confidence. Farmers, in all parts of the Dominion, have probably never been in a better position.

This must inevitably affect the immigration movement and influence observant and thinking men considering the improvement of their positions. Already there has been a marked stimulation in land settlement and the interest on the part of prospective this year augurs a more vigorous future for the immediate future.

Government schemes promise to continue the flow of an assimilable immigration and ensure the maintenance of the British element in the agricultural population through the steady training and graduation of British youths. In addition, plans of the railways, having regard also to the large offerings from preferred European countries, promise a steady flow of good material from these sources.

As regards the bulk of the population other than agricultural, it is to be noted that the employment situation has continued to improve throughout the year and that in the fall of this year it is better than at any time since the peak of post-war activity in 1920. At the same time a slow but steady decline continues in the cost of living as disclosed in the Government's average weekly cost of a family budget. The value of Canadian funds has reached new heights.

With a substantial balance in Canada's favor after the process of adjustment. Manufacturing and general domestic trade are in good shape and a cheerful outlook prevails. The lumber industry promises a heavier harvest in many sections this winter, while the pulp and paper industry continues to bring in greater revenue. Mining activity has been particularly encouraging and a new production regarding is indicated for the year with yet more vigorous activity in the immediate future.

Building has been greater than in any year on record. An outstanding feature has been the construction and projection of new hotels in many parts of Canada, this, in a manner, reflecting the increasing volume and value of the tourist traffic. This has been greater than ever before in Canada's history and, already among the prime sources of Canadian revenue, promises a steady ascension in the future. Car loadings, bank debits, rail way earnings, etc., are indicators combining to prove that Canada is well upon the path to prosperity.

Money from foreign sources, particularly the United States, has been coming to Canada in volume. Occasional gratification is the evidence that British capital is returning for investment and can be expected in larger amount in the future. This, with the flow of surplus funds from the United States, is authoritatively considered, will result in an active industrial development.

With such a flow there must be a movement of people, and certainly at no time since the end of the war has the situation been more propitious for a vigorous immigration. New peoples coming to Canada today launch out upon fresh careers under favorable circumstances in a country which has laboriously and valiantly overcome her post-war problems and is definitely set out upon the way leading to a new and greater prosperity.

So far as conditions locally are concerned, the town has every reason to look forward with encouragement and promise provided we have proper leadership and our people generally show that interest and co-operation which are so necessary for the welfare of any community. On the whole we may enter upon the new year with hopes for progress and prosperity.

St. John's Church Choir Coming Here Tonight

Will Put on Entertainment in Gordon Memorial Church

Despite the cold weather the members of St. John's church choir, Medford, N.J., have determined to keep their appointment and put on their entertainment as advertised, in Gordon Memorial church tonight. We are assured they have an excellent program and since these artists are bringing the elements it should make Redcliff people more determined than ever to turn out in full force and give them a good reception.

The program will commence promptly at eight o'clock. Be on time and get a good seat.

Annual Meeting of Girls' Auxiliary

Of St. Ambrose Church was held Last Tuesday

The annual meeting of the Girls' Auxiliary was held at the Yvonne on Tuesday evening, when Mrs. Cooper was elected president, Miss Broadfoot vice-president and Miss Esther Johnson secretary-treasurer. The report of the year's work showed very satisfactory results. After the meeting a social hour was indulged in for the members of the evening, refreshments being served about 10.

THANKS AND NEW YEAR GREETINGS FROM GORDON MEMORIAL CHURCH

Before the curtain falls over the year 1927, now closing, Gordon Memorial church desires to express her gratitude to the many people who have been friendly and helpful during the past twelve months. To you Mr. Edler for generous space in advertising and reporting her activities; to the ladies in the various departments for their loyal painstaking services, which sometimes made heavy demands upon both time and strength, which we are confident has brought its own reward; to the friends who are not members or adherents of the congregation for their goodwill and co-operation.

Gordon Memorial longs to take friends, new and old, also the strangers who are coming to our community from other lands closed to her heart and closer to the heart of her Lord and Master Jesus Christ. Meanwhile, as we enter together upon the New Year, we each resolve to keep through sympathetic attitude kind thoughts and loving service, the happiness of all. Thus can we make 1928 rich in the golden treasures of fellowship and friendship.

Sincerely and gratefully yours,
R. N. Matheson, Minister.

TURKEY RAISING COMING

INDUSTRY IN ALBERTA

Turkey raising is a coming industry in Alberta as a number of measures at various fairs would indicate. A recent move in this connection is the formation of the Alberta Bronze Turkey Broilers' Association, which is now active in promoting and extending the turkey breeding industry.

Christmas Service At Gordon Memorial

Were Well Attended at Both Morning and Evening

Christmas services in Gordon Memorial were well attended both morning and evening. At the morning service the Junior Choir rendered three special anthems which were much appreciated. The minister gave a talk on the history of the Christmas story, which followed by the singing of the "First Nowel." The morning sermon, "The Soul of Christmas," was based on the words of the "The Vision Man, 'Where is he?'"

The speaker drew a parallel between the time when our own men again the mysterious spiritual longing heart of the East is appealing to the Christianity of the West with the question, "Where is he?" China and India do not want Jesus Christ. Let us borrow through the trappings and garments of the East and join with the ancient west men in asking, "Where is he?" And, having found Him good, those great people to the feet of their true King, the Prince of Peace.

After the morning service the choir assisted by several from the congregation, gathered about the door of Mrs. Henderson's home and sang the old Christmas favorite, "The Herald Angels." Although "what is," Mrs. Henderson is greatly beloved by the young people. To win her approval, which is so greatly and so beautifully made Christmas happier for all who took part in the little service.

In addition to a special Christmas number by the Senior Choir, the evening service featured hearty congregational singing. The text, Isa 7:14, "His name shall be called Immanuel," "God with us," formed the basis of the evening address.

Local Legion Holds Christmas Tree

Was Largely Attended And Was a Great Success

The last evening was a busy place last Thursday evening for the annual Christmas tree, entertainment put on by the local Legion. The building was taxed to capacity to accommodate the large crowd of young and old and a merry time was spent from start to finish.

The program started with a delight drive around town for the children after which they were treated to a banquet. This finished, Santa Claus was taxed to capacity to accommodate the large crowd of young and old and a merry time was spent from start to finish.

The program started with a delight drive around town for the children after which they were treated to a banquet. This finished, Santa Claus was taxed to capacity to accommodate the large crowd of young and old and a merry time was spent from start to finish.

LEGISLATURE SESSION TO OPEN FEBRUARY 2

The Alberta Legislature will convene for its 1928 session on February 2, commencing at the noon hour. A session made during the past week by Premier Brewster. It is not expected that the session will be a lengthy one this year, although a number of new bills and amendments are being included in the agenda which is now in course of preparation.

ENYI CANADIAN RAILWAYS

"One distinct advantage Canada has over Australia is her wonderful railway facilities," said M.P. Greenwood Adams, noted Australian lecturer and traveler, now visiting Western Canada on a lecture tour. "We in Australia," he said, "look upon Canadian transportation with envy."

Victims of alcoholic poisoning, seven men are dead, two are in the hospital, die each day, as a result of Christmas festivities in Winnipeg.

Japanese Oranges for Canadian Christmas
R other more than four oranges for every man, woman and child in Canada or a total of 632,000 boxes of this fragrant fruit were landed at Pier "B-4" of the Canadian Pacific Railway at Vancouver in December, and were rushed through the prairie provinces and to the east of Canada for the Christmas trade. Photograph shows the first of these C.P.R. trains enroute Canada moving west upon its rush coast. Thousands more trains followed it at short intervals from the pier, and in all seven special trains were used to convey this huge cargo. The likelihood is therefore pretty strong that many of the oranges you may see hanging from Christmas trees or popping out of Christmas stockings were grown in the land of the Rising Sun. It is further an indication of the great trade passing through the port of Vancouver.

The Prevention Of Smallpox

Vaccination Appears To Offer Best Means Of Stamping Out This Disease

Among those who are opposed to vaccination as the most effective safe measure in preventing smallpox and in squelching the disease if it should reach epidemic form, it is customary to criticize the health authorities of referring to the terrible roads which this scourge used to make on the population of every nation in years gone by and in past centuries. It is the practice to request modern data.

In this connection, it must be pointed out that a knowledge of the terror which smallpox aroused in the minds of medieval peoples and even in comparatively modern times, is absolutely essential for any clear understanding of what this disease is and how effective medical means of keeping it under control really are.

It is for this reason that we must not only that the health officer deliver his history. It is not necessary to go back three years nor to go outside the borders of the Province of Ontario, since convincing proofs of the value of vaccination as a preventive measure.

In the latter part of February, 1925, the border cities, including Windsor, were struck by an epidemic of the first, showed signs of rapid development.

The highly contagious nature of the disease and the danger which a whole community runs if the presence of a single case is overlooked was amply demonstrated here when the epidemic and stealth with which the disease made its appearance. It was almost untraceable, after the health authorities, for health officers to trace it to its original starting place.

There were two types of smallpox, one a mild type and the other a severe and virulent one. The first variety was a further-developer, who had never been vaccinated, and was known to have been in contact with one of some kind. Some of the cases where this man had been vaccinated shortly before he took sick failed to reveal the source of the infection.

It is possible, therefore, that some contact, so unimportant that he could not remember it, on the part of one man who had never been vaccinated, was responsible for all the deaths which followed.

The strictly good law that no unvaccinated person can be a menace to himself.

The only other period of interest, when smallpox was so common, was the epidemic which commenced here in the fact that just before the Windsor outbreak, there was a severe epidemic in Chicago, Ontario, and there may have been some connection between the two.

There were, all in all, 33 cases reported and, among these, 22 deaths. But no person who had been vaccinated at any time in his life was taken a century rather than the methods of administering vaccine were not developed to the high point of their efficiency, having reached their use at any time seriously or dangerously ill.

No person, who had at any time been vaccinated, died of the disease. Not one of the fatal cases had been protected by vaccination.

The most severe or hazardous cases were all among unvaccinated individuals and every one of these died. They comprised 50 per cent of the total deaths.

The further-developer who was the first to contract the disease eventually recovered, though his case was a very severe one. His wife and his sister, neither of whom had ever been vaccinated, both took the disease and died. His little child, who was 21, had been vaccinated by the school authorities five years before. Although exposed to the disease almost as much as the other two, she was completely protected and never contracted it.

In another family, a man, aged 45, and his wife, aged 40, both took smallpox. The man had been vaccinated 60 years before. His case was very mild. He did not have fifty spots all told and soon recovered. His wife had never been vaccinated. She died.

If you consult a physician, he will tell you that one successful vaccination will give you active protection for from five to seven years. Yet, in Windsor, there were several cases of people vaccinated forty to sixty years before and never since, to whom this safety measure in their childhood was the difference between slight sickness and death.

In another family, a man and his wife lived with the disease for many years old. Neither the man nor the wife had been vaccinated. Both died of smallpox. The old man had been vaccinated 47 years before. He had

Idea Sounds Reasonable

Prisoners Should Receive Wages For Upkeep Of Their Cells

Says W. H. Hughes
Should prisoners be paid wages and then be allowed to be utilized for the upkeep of their families at home? This is the view held by W. H. Hughes, Superintendent of Penitentiaries for Canada, as expressed before a gathering of Kitchener in Toronto. It has long been felt that the real solution of the problem would be to pay the supporters of dependents as well as to let the prisoners be left at home. The prisoners are not left at home and regularly let the poor wife and children are not so fortunate and they undergo. In many cases, untold privations and sufferings through lack of support. This would certainly appear to be a strong argument. There is no particular reason why the inmates should be made to suffer for the crime of others and yet this is precisely what it amounts to. The plan is to let the inmate work and pay wages and then be allowed to be left at home. The plan is to let the inmate work and pay wages and then be allowed to be left at home. The plan is to let the inmate work and pay wages and then be allowed to be left at home.

An official report was made in June, 1914. The first case had been reported in the latter part of February. General vaccination had been carried out immediately thereafter, continuing until the beginning of March. Between March 1st and early summer, when the report was made, no other case of smallpox had been reported.

The facts in connection with the Windsor case have been checked and rechecked by several health departments. To day Windsor is the best protected population in Ontario. There will be no more epidemics.

Will Found In Old Book

Discovery Leads To Search For Treatise in French

The chance purchase of a book of old books on the part of a teacher of Metz brought about a treasure hunt for the oldest of a neighbor village which has already created the interest of all the inhabitants of the district and may have a result in the discovery of long-ignored lights. They are said to have been buried in the year 1612. The lights are estimated to have an approximate value of \$100,000.

The books were bought a number of months ago and being unused by the owner, he had the bookkeeper decide to go through them, to see what of value for individual sale and destroy the rest. He did this, and just as he was about to burn the book in question, which is an old family book, he noticed that there were two documents between the covers.

He examined these and found that one, which was written on parchment, was the Queen's will, beginning, "all his worldly goods to the Church, and the other was a diagram showing where he had buried two heavy chests containing gold, family jewels and other objects of value.

The bookkeeper showed these to friends, who were convinced of their authenticity and offered to furnish money for the excavations, which are now going on.

Has No Use For Watch

Rich Young Man Says Time Means Nothing To Him

I don't want an office day who has never carried a watch in his life, he has no clock in his home, he says. He does not give a darn what time it is, he goes up when he wants to. If he has an appointment he tells his valet about it or his secretary, and they inform him as to his appointment. He is late to know the time, he says any one who may have a watch. During his life he has been given many watches, but he is all right in one drawer and have never been carried. The man of question has plenty of time in his hands, he is thoroughly rich, young and never worried by his life.

Can Hear Through Ore

Seamen along Long Island Sound have discovered a novel way to get their bearings when they are in small boats during thick weather. They put an ear in the water, give their ear to the water, and hear the sound of the bell on the lights several miles away.

Four Grizzlies With Five Shots

The story of a man who, attacked four grizzlies, killed all of them with five bullets is one of the most unusual to come out of northern British Columbia. The above photograph shows Ed. Anderson with his quarry after the shooting.

Ed. Anderson, Land Agent of the C.P.R., got this story straight from Ed., as well as from some trappers and miners in the vicinity of Kluane Lake, where this remarkable incident occurred. Anderson and George Curtis were following a trap line in the Kluane Valley and Anderson returned to the camp alone along the edge of the ridge. It was growing a little dark when he was alone and he heard a noise behind him and turned to see four enormous grizzlies making towards him as fast as they could go.

Claim World's Best Hotels in London

United States Outdone By Luxury Of New Buildings

Americans and other world who have visited by the inspectors of the Dominion Department of Agriculture are beginning to be interested in the general run of common stock. The rules and regulations governing the production and inspection of this certified seed are given in a new pamphlet on Certified Seed Potatoes, distributed by the Publications Branch, Department of Agriculture, Ottawa. The pamphlet sets out for certification are high and the results from the use of certified seed have been correspondingly favorable.

When potatoes are grown for seed purposes or table stock, it is essential that the very best seed be used, and, therefore, by operating a few switches, it will be possible to make any or all of these stations terminate, and, therefore, to transmit messages to any or all of them.

The Toronto-Vancouver link of the "carrier current" system is the longest single section of "carrier" wire in operation, comprising as it does seven repeater stations. These stations are located at Fort Erie, Windsor, Detroit, Horseyville, Jellison, Port Arthur, and Port Franco, and the system provides a direct connection between the two cities.

The telephone director, who is in charge of the telephone exchange, is the one who is in charge of the telephone exchange. The telephone director, who is in charge of the telephone exchange, is the one who is in charge of the telephone exchange.

A Remarkable Record

England Has Erected More Than A Million Homes Since The Armistice

The interesting information is contained in the statistics from the Old Land that England has performed the tremendous task of erecting 1,357,757 houses since the day the Armistice was signed. Upon first consideration it does not seem to be such a great achievement, but when one considers the fact that at the end of the war, with a heavy debt hanging over her shoulders which she has steadily managed to meet year after year, and the great burden of taxation which the government was compelled to lay upon the shoulders of the people, it is a truly remarkable thing that in spite of all this to the thing of course has been the feeling of credit, leading up to the worst strike the country has ever known, and adding to the difficulty of pre-war re-establishment of a new era of business and social utility—England has been able to face the task of providing over a million homes for her people.

Manners In Three Grades

Two Unaffected By Time and One Subject To Change

Manners are becoming so much a matter of life and death that what a contributor to the London Graphic says about them is quite timely: "The difference between good and bad manners is as deep as the difference between sympathy and curiosity; so deep, in fact, that it would be hard to grade manners—the eggs—into three classes: viz. Class A, good manners; Class B, indifferent manners; Class C, bad manners. The first and third classes are equally unchangeable in time and tide, the class midway being the only one that is subject to change and digestion and that but purely individual cases.

The second class is that good manners are natural and individual, neither the product of any particular process or period, and just as common now as they ever were.

Some Chinese Sayings

Have Ways Of Their Own To Impart Information

There are some Chinese sayings of how to give news a nice sound if a man's parents die the Chinaman informs his friends by saying "They are not." The death of an official is made public by the announcement "He is drawing no salary." An ordinary ball game going dry is said to have "become an accident." After burial, the corpse is referred to as being "in the city of old age." In the same way many other things are given names. The musketeer is "a fairy umbrella," and oranges are "golden balls." A burglar who is a thief of a man of the beam, while to give him money is "to scatter seeds."

Not Restricted To Numbers

The prohibiting counsel had been considered a rather difficult matter. At last, unperceived by the man's creator, however, he asked him whether he was acquainted with any of the party.

"Yes, sir," he replied, "none but half of them."

"Are you willing to swear that you know more than half of them?" demanded the man of law.

The other thought quickly. "I am willing to that," he replied. "I'm willing to swear that I know more than all of 'em put together!"

Bill: "How shall I address the most beautiful creature, darling girl in the whole world?"

Paul: "Look in my dining book. I think her name and street number's on the second page."

Seed Potatoes

The Superiority Of Certified Seed Potatoes Is Easily Shown

It has been clearly shown during recent years that the seed potatoes certified by the inspectors of the Dominion Department of Agriculture are beginning to be interested in the general run of common stock. The rules and regulations governing the production and inspection of this certified seed are given in a new pamphlet on Certified Seed Potatoes, distributed by the Publications Branch, Department of Agriculture, Ottawa. The pamphlet sets out for certification are high and the results from the use of certified seed have been correspondingly favorable.

When potatoes are grown for seed purposes or table stock, it is essential that the very best seed be used, and, therefore, by operating a few switches, it will be possible to make any or all of these stations terminate, and, therefore, to transmit messages to any or all of them.

The Carrier Current System

Canadian National Telegraph First To Introduce System Into Canada

The office operating the "carrier current" system by the Canadian National Telegraph, on Wednesday, November 11, 1925, was the completion of the second link of the installation, from Montreal to Vancouver, of the "carrier current" system. The first link, from Toronto to Montreal, was put to active service on April 25, and the system will be extended to Vancouver as rapidly as possible. When it is completed, Montreal, Toronto, Winnipeg, Saskatoon, and Vancouver will be connected, and by operating a few switches, it will be possible to make any or all of these stations terminate, and, therefore, to transmit messages to any or all of them.

The Toronto-Vancouver link of the "carrier current" system is the longest single section of "carrier" wire in operation, comprising as it does seven repeater stations. These stations are located at Fort Erie, Windsor, Detroit, Horseyville, Jellison, Port Arthur, and Port Franco, and the system provides a direct connection between the two cities.

A Remarkable Record

England Has Erected More Than A Million Homes Since The Armistice

The interesting information is contained in the statistics from the Old Land that England has performed the tremendous task of erecting 1,357,757 houses since the day the Armistice was signed. Upon first consideration it does not seem to be such a great achievement, but when one considers the fact that at the end of the war, with a heavy debt hanging over her shoulders which she has steadily managed to meet year after year, and the great burden of taxation which the government was compelled to lay upon the shoulders of the people, it is a truly remarkable thing that in spite of all this to the thing of course has been the feeling of credit, leading up to the worst strike the country has ever known, and adding to the difficulty of pre-war re-establishment of a new era of business and social utility—England has been able to face the task of providing over a million homes for her people.

Manners In Three Grades

Two Unaffected By Time and One Subject To Change

Manners are becoming so much a matter of life and death that what a contributor to the London Graphic says about them is quite timely: "The difference between good and bad manners is as deep as the difference between sympathy and curiosity; so deep, in fact, that it would be hard to grade manners—the eggs—into three classes: viz. Class A, good manners; Class B, indifferent manners; Class C, bad manners. The first and third classes are equally unchangeable in time and tide, the class midway being the only one that is subject to change and digestion and that but purely individual cases.

The second class is that good manners are natural and individual, neither the product of any particular process or period, and just as common now as they ever were.

Some Chinese Sayings

Have Ways Of Their Own To Impart Information

There are some Chinese sayings of how to give news a nice sound if a man's parents die the Chinaman informs his friends by saying "They are not." The death of an official is made public by the announcement "He is drawing no salary." An ordinary ball game going dry is said to have "become an accident." After burial, the corpse is referred to as being "in the city of old age." In the same way many other things are given names. The musketeer is "a fairy umbrella," and oranges are "golden balls." A burglar who is a thief of a man of the beam, while to give him money is "to scatter seeds."

Not Restricted To Numbers

The prohibiting counsel had been considered a rather difficult matter. At last, unperceived by the man's creator, however, he asked him whether he was acquainted with any of the party.

"Yes, sir," he replied, "none but half of them."

"Are you willing to swear that you know more than half of them?" demanded the man of law.

The other thought quickly. "I am willing to that," he replied. "I'm willing to swear that I know more than all of 'em put together!"

Bill: "How shall I address the most beautiful creature, darling girl in the whole world?"

Paul: "Look in my dining book. I think her name and street number's on the second page."

Teaching Hatred of Britain

Trade Spending Unlimited Funds in China Says General Sutton

"The whole of Mongolia is now in the hands of the Bolsheviks and they are sending hundreds of agents supplied with unlimited funds into Southern China with the idea of stirring up against Great Britain," General F. A. Sutton, picturesque soldier of fortune and promoter, told the Ottawa branch of the Engineering Institute of Canada.

The man, who for six years was military adviser to Marshal Chang Twei-lin, head of the Peking government, declared that he has seen orders from the Moscow government, "directly advocating wholesale murder to stir up anti-British feeling."

According to General Sutton, 50 per cent of the people of China were hopelessly poverty stricken. The present necessity of getting something to eat was the main consideration of the bulk of the population.

General Sutton thought the main source of trouble in China as it affected Great Britain was in British lack of a strong policy. To a great degree the fault, he practically the whole of Southern China was now pure Bolshevik camp as a result of this policy, he declared.

New Ruling For Settlers

Will Receive Medical Certificates Before Leaving For Canada
Interviewed in London on the recently announced intention of the Canadian Government to establish in British Columbia, Canada Pacific Railway, officers for examination of intending settlers for the Dominion, Sir George McFarlane, European general manager, Canadian Pacific Railway, said that the new plan in being put into effect with the object of averting possible expense and waste of time to the migrant and of avoiding the possibility of rejection on arrival in Canada through failure to comply with Canadian medical regulations.

Under the new plan all who desire to settle in Canada will be medically examined here before leaving their homes. This examination will be final and there will be no further examination to undergo on arrival in Canada. It will also allow possibility of intending migrants going up their positions or selling their business until they have passed the Canadian doctor.

George Sawyer, a member of the St. James Lake hunting party of Halton, Ont., was fortunate in securing a flock of the deer family in the form of a white buck. It was exceptionally large, weighing over 500 pounds.

The top of gold commissioner in the Yukon territory, which is now vacant, will, it is understood, likely be filled by a promotion from within the civil service. The Yukon is administered by the department of the Interior at a cost of \$150,000 a year.

In the last year, 147 Catholic children have been executed in Mexico, W. F. Montevideo, of the National Catholic Welfare Conference of Washington, told members of the Monday Club, an organization of social workers in New York.

More than half a million aliens were admitted to the United States during the 1927 fiscal year, and the number was considerably greater than during the previous year. The figures were 133,601 admissions in 1927, and 155,146 admissions in 1928.

Ronald Marshall, son of John Marshall, Edmonton's city architect, has been selected as a Rhodes scholar for 1928, and will proceed to Oxford next autumn. This is the 13th selection made at the University of Alberta.

New Distress Call

For Radio Telegraphy

"May Day" Is Equivalent To SOS In Telegraphy

A distress call for use in radio telephony and to be the exact equivalent of the Universal SOS in telegraphy has been advised by the International Radio Conference here and has been incorporated in the new international wireless convention.

The new call for help is "May Day" to be spoken through the broadcast apparatus. This would be followed immediately as in the case of SOS by details as to the location of the vessel or the distress call.

"May Day" is the phonetic spelling of the French word "mader," meaning "help us."

High and low tides may be predicted two years in advance and up to the world by a recent exhibit, this invention, consisting of 32,000 parts.

Rheumatic Pains

Gentle massage with Minard's will work out stiffness and drive away pain.

Why Chinese Are Fighting

Brigand War Lords Robbing People For Their Own Enrichment

A writer in the press says that "If the Chinese knew what they are fighting about it certainly gives them a most decided advantage over the rest of the world."

But if the rest of the world does not know, is it not because the rest of the world does not know of the fact that the people of the world will not make the facts of the case known?

The head outline of the trouble in China is that the country is being mismanaged and plundered by brigand war lords, who have no interest in the welfare of the people, but only in their own enrichment and to pay interest on their foreign borrowings. These war lords fight with each other if they have no other war to do, but for two or three years they have had plenty of fighting offered them by a civilian uprisings against warlordism, which is it with foreign aggression.

The true interest of the western nations will eventually be found to lie in China, as the provinces have been recognized in recent years to a steady increasing extent. None would go into it more than those engaged in our primary industry. The most far-sighted farmers realize this. With their own land and other natural resources it should not be necessary in this province to wait upon fresh discoveries in the north for a rapid development of our activities, but the possibilities that lie in that direction may receive quite as much attention as is being given to them by our eastern neighbors.

There can be little question that our interior contains great natural resources than that of any other part of the Dominion and it is essential that an energetic policy for the opening up of this vast wealth be adopted. The fact that the provinces is the top of two railway systems that up to this is a strong additional reason for active development of this end. Mr. Duggan's call for vision and courage should have special heed from the people of the government and the people of Alberta.—Edmonton Journal.

Remarkable Story

From London Hospital

How Messenger Boy Earned Money For Father's Operation

When Prince Henry recently visited the Royal National Orthopedic Hospital in London, he heard from the manager a London messenger boy to effect the cure of his baby sister, who had been a cripple from birth.

The decision not to proceed with two of the three cruises which were to have been laid down this fiscal year is regarded as a gesture of the British Government to preserve a lively interest in the proposals for armament reduction.

Predicts Dominion

Rule For Scotland

Is Following Lead Of Free State Says Irish Nationalist

Dominion home rule for Scotland within ten years has been predicted by Jeremiah MacVeigh, leader of the Nationalist and former member of Parliament.

"The nationalist spirit is awaking in Scotland as it swept Ireland," said MacVeigh, "and I am certain that within ten years Scotland will have the same form of government as has the Free State."

"Scottish freedom will not be won by the same means as was Irish freedom, but will come automatically and peacefully as the demand grows for freedom from the English Parliament."

Is Member Of Crew

Lady Cushman Is Accompanying Her Husband On His Present Important Trip

Lady Cushman is accompanying her husband on his present important trip, not as a journey, but as a member of the crew, her work being to act as secretary to Sir Alan. He serves as a cook and to be ready to give first aid in case of accident. The plane is equipped with cooking apparatus which can be used during flights and this Lady Cushman will superintend.

Reggie—"What do you like me to use, baby?"

Marjorie—"Well, as I'm a baby, I must be because you're so railroaded."

It was a case of the office seeking the man.

New Carrier-Current System Inaugurated

New carrier-current system of establishing commercial and railway telecommunication between Montreal, Toronto and Winnipeg, was given a remarkable demonstration in its headquarters recently by the C.N.R.

Here A. E. Warren, general manager of the central region of the National Railway, Toronto, is shown talking to Winnipeg, while a telegraph message is being simultaneously transmitted. The service, it is estimated, will mean a saving the company of about \$150,000, and is the equivalent of 2,500 miles of new line.

Unlocking North's Wealth

Mineral Wealth Of Prairie Provinces To Be Made Accessible By Railroad

Mr. Drinning shares the view that the enterprises that are now secured in northern Manitoba mean much to the Saskatchewan and Alberta, as well. The establishment of the first railroads between the lakes and the mountains is, he says, "the key which will unlock the door of the mineral wealth of the prairie north-west."

As a result of the start now being made, there will be in the next twenty years an industrial expansion in the north which will balance the agricultural of the south, thus contributing greatly, as the minister puts it, to the solution of present problems arising from unbalanced development.

At this takes place, enlarged opportunities will be open for our young people and he has no doubt that the people of the plains, both in the city and in the country, stand "at the threshold of a greater future, the benefits of which can only be measured by their own courage, enterprise, business judgment and foresight."

The need of a more varied economic life in these provinces has been recognized in recent years to a steady increasing extent. None would go into it more than those engaged in our primary industry. The most far-sighted farmers realize this. With their own land and other natural resources it should not be necessary in this province to wait upon fresh discoveries in the north for a rapid development of our activities, but the possibilities that lie in that direction may receive quite as much attention as is being given to them by our eastern neighbors.

There can be little question that our interior contains great natural resources than that of any other part of the Dominion and it is essential that an energetic policy for the opening up of this vast wealth be adopted. The fact that the provinces is the top of two railway systems that up to this is a strong additional reason for active development of this end. Mr. Duggan's call for vision and courage should have special heed from the people of the government and the people of Alberta.—Edmonton Journal.

Hopes League Can Avert War

Former French Delegate Says 1925 Will Be Crucial Year

The United States will not be on the same side as Great Britain in another European war, Henri de Jouvenel, former French delegate to the League of Nations, predicted in a letter read at the International War Danger Conference at London.

M. de Jouvenel, who recently resigned as League post as a protest against the policies pursued at Geneva, was given the address of the conference, but sent a message which was read instead.

The French statesman pointed to the building up of the recent naval conference and said:

"Naval rivalry brings in its train the rivalry with the growth of land armaments, rivalry of great states which are potential foes."

He predicted 1925 as a crucial year, when the peace structure would hold gold, but expressed the hope that by that time the League of Nations would have gained the authority necessary to prevent the recurrence of war.

Metal Light As Aluminum

Important Discovery Made By German Professor

A new alloy said to be three times as strong as iron, and as light as aluminum, has been brought to this country by the inventor, Dr. Karl Wurmach, professor of metallurgy at the University of Munich.

Of the alloy, "Alumalium," Dr. Wurmach claims, is the most important discovery of the kind since the invention of duralumin in 1907. A plane made of alumalium, he said, would be so light that it could be picked up by a single boy.

Growing Trees From Seed

The Land Department of British Columbia Has Landed a Plot Near Victoria City Where Forest Trees Will Be Grown from seeds and planted, especially to raise timber supplies for a future generation. The tiny trees will then be planted in various government timber reserves within the province.

An automatic distress signal broadcast for ships and airplanes has been invented. It transmits sound signals, the ship's coil letters and the location.

Watches and clocks made in this country in the past year had a value of nearly \$1,600,000, the production breaking all records.

China has as many different languages as there are days in the year.

Cold Relieved or Money Back

Buckley's Cold Cream

Everyone who uses Buckley's Cold Cream will find it a relief from colds, coughs, and sore throats. It is the best cold cream ever made. The first dose gives you relief. The second dose gives you relief. The third dose gives you relief. The fourth dose gives you relief. The fifth dose gives you relief. The sixth dose gives you relief. The seventh dose gives you relief. The eighth dose gives you relief. The ninth dose gives you relief. The tenth dose gives you relief. The eleventh dose gives you relief. Fights 19 Years To Get Rid of Gas

"I had stomach trouble for 19 years. Since taking Adierka I feel better than for years and have not been bothered with gas,"—L. A. Champion. Even the FIRST spoonful of Adierka relieves gas and often removes something amount of old waste matter from the system. Makes you enjoy your meals and sleep better. No matter what you have tried for years and weeks, Adierka will cure you. C. T. Hall, druggist.

Hear This Amazing
Westinghouse Model 57

The unparalleled performance and pleasing appearance of this new model will amaze you. It sets a new standard for radio sets of the moderate price class. Contains all the latest improvements, including one dial control. Uses the new Westinghouse UX-201-B radiotrons which consume but half the filament current of tubes of equal power. And the price is only \$75.00, tubes extra.

The 57 is but one example of the surprising values awaiting you in the complete new line of Westinghouse radio sets. There is a model to meet every requirement of socket or battery operation—one that will serve you best in your location—at a price that will suit your purse. Demonstrations gladly given in your own home or at our showrooms. Arrange for one to-day.
